Bariatric Services

You've tried everything to lose weight. There isn't a diet you haven't experimented with, an exercise regimen that you haven't begun, or a weight loss pill that you haven't taken.

Yet nothing ever quite got the weight off, no matter how hard you tried... until now!

Bariatric surgery is a proven and tested solution to long-lasting weight loss for those who suffer from morbid obesity and the life-threatening side effects that can come with it.

Let the Piedmont bariatric team help you live a healthier life without obesity. Led by fellowship-trained and board-certified bariatric surgeons, our program uses a personalized, comprehensive team approach to help you lose weight. Our team of physicians, nurses, nutritionists, fitness and sleep experts will help you address all aspects of weight loss before and after surgery. Additionally, with its 100 year history, you can find world-class physicians at Piedmont in nearly any specialty who can address other co-morbid conditions that you may have.

You are not alone in this. We are here to help you every step of the way.

Speak with one of our surgeons first-hand to decide if bariatric surgery is the right option for you.
